

## FRANCE SEEMS TO BLOCK THE GAME

### Point Discussion On Anglo-French Feeling Enlivens Conference

(By Associated Press)  
Washington, Dec. 29.—The direct question of whether future submarine warfare shall be conducted under a civilized rule was raised today by the American delegates before the American conference committee. American delegates urged adoption of the Resolution and won the support of Great Britain, but the French, Japanese and Italian delegates expressed reference of the matter to a commission of experts. The Root resolution would require the use of submarines against merchant craft.

Washington, Dec. 29.—Its horizon clouded by many elements of uncertainty, the Arms Conference today entered into the physical negotiations as to whether it will be successful in imposing limitations on any class of weapons except capital ships. The naval committee is considering a proposition to limit construction of airplane carriers. It is on this proposition and on proposals to restrict the use of submarines and the size of individual auxiliary warships that the American delegation now pins its hope of amplifying the capital agreement already reached yesterday afternoon as to replacement.

Abstention also centered about a Root proposal to limit submarine operations, but it is indicated no agreement on that feature is in sight.

It is privately conceded in all quarters that negotiations on the remaining issues of the conference are not made easier by yesterday's pointed exchanges in the committee which heard the final report of France to lay aside its submarine program. The on declarations of Arthur Balfour of the British group and Mr. Sarraute of the French regarding future Anglo-French relations mentioned as an unusual step in diplomatic history as bringing to the surface embarrassments that have complicated the relations between the two nations ever since the armistice. Secretary Hughes today countered with President Harding but the trend of the discussion was not revealed.

### France Isolates Herself

Washington, Dec. 29.—It was said tonight that France had achieved the position she most ardently had professed to fear—the most isolation of the world. Between meetings and negotiations, conference circles and diplomats are being called down upon the head of France because of the obstinacy which reached its limit yesterday and prevented any agreement in the immediate future on submarines or auxiliary craft. In the space of a few hours France has dimmed the success of the world conference that glowed so brightly only a few days ago.

## DAUGHERTY TO GIVE OUT COST PRICES

(By Associated Press)  
Washington, Dec. 29.—Aid of the attorney generals of the various states will be relied upon by the Department of Justice in an effort to readjust prices of the necessities of life. Attorney General Daugherty said today. When the department's investigation of retail prices is completed, Daugherty said, he expected local authorities in the different states to take necessary steps to remedy local situations while the department would act in cases where there are violations of federal laws. Daugherty said he expected to publish a table of the cost of food, fuel and clothing to the consumer in different localities as compared with the cost of production of these commodities in order to bring to the attention of the public any wide margin found to exist between these costs. He said the department's investigation already had some effect upon profiteering.

## PHONE QUESTION UP TO NEW COUNCILMEN

### Informal Discussion Had As To What Steps To Take About Rate Reduction

The question of what the City of Richmond is going to do about the suit brought in Federal court by the Cumberland Telephone & Telegraph Company to prevent decrease in rates below war-time figures, was informally discussed at a meeting of the members of City Council with Mayor O'Neil Wednesday night.

If the city desires to file answer to the suit now pending before Judge Cochran it must have it in the court by January 15th. Mayor O'Neil felt that the councilmen should advise themselves of conditions so that they may be prepared to take some action at their first meeting in January. At present the city is restrained from any action toward enforcing reduction of rates by the temporary injunction granted by Judge Cochran. If the city decides not to file further pleadings, the temporary injunction will be made permanent. The question of whether the city ought to employ an expert engineer to make a complete appraisal of the phone company's property, here and examination of its books, has been discussed. Objection to this was the great cost that would fall upon the city, and therefore the taxpayers in general. Another line of action has been suggested that would not entail any such expense. Or it has been suggested that perhaps the telephone company would be willing to withdraw its suit and send experts here to take up the question of rates and service with the members of the new council. It seems to be generally agreed that the question of service that the local exchange is giving will enter largely into future consideration of what action the city may be inclined to take.

## BOONESBORO ROAD NOW BOONE HIGHWAY

The road between Richmond and Boonesboro Baiting Bench has been officially designated as "The Boone Highway." This was done at the recent meeting of the Madison Fiscal Court, upon motion of Dr. D. J. Williams. This pike has gone under several names. It has been known as the Ford pike, the Shearer road, and the Red Horse pike. It was felt that nothing could be more appropriate than that it should be named for the pioneer who founded Boonesboro, so the Fiscal Court took official action to that effect.

## VITAMINES IN FOOD NECESSARY TO HEALTH

Says Dr. Harrow of Columbia University

A New Vitamine Tonic Food Perfected At One of Our  
Leading Medical Colleges Now On Sale In Richmond

Dr. Benjamin Harrow, Profes-  
sor of Physiological Chemistry,  
of Columbia University, says:  
"Vitamines in our food are essen-  
tial to our well-being and the en-  
tire absence of Vitamines makes  
life impossible."

This modern scientific discov-  
ery is now being discussed by  
government health experts and  
doctors everywhere, and it has  
been proven over and over again  
that—even when people have  
good appetites and eat heartily—  
unless they eat foods rich in vi-  
tamines they are apt to be under-  
nourished. Because so many of our  
present day foodstuffs are robbed  
of their vital life-giving prop-  
erties in the manufacturing process  
which prepare them for quick,  
convenient use.

An unusual series of tests in  
this line was recently made at  
one of our great Medical Colleges,  
where it has been repeatedly  
proven that improper feeding is  
one of the chief underlying causes  
of sickness and physical dis-  
ability. In some cases it is a  
matter of not enough food and  
in other cases too much. In a  
majority of instances, however,  
it is wrong food combinations—  
poorly balanced rations.

That is why the experiments  
made with a new health tonic  
food, under the direction of Dr.  
Philip B. Hawk, at Jefferson  
Medical College, Philadelphia,  
have attracted widespread atten-  
tion. For after a long series of  
actual tests on men, women and

children, he and his associates  
found this new form of concen-  
trated nutriment most effective  
as a quick renewer of strength  
and as a body builder.

This preparation is known as  
SUSTO and is rich in the nutri-  
tive and growth-promoting ele-  
ments of Beef, Milk, Rice, and  
Yeast, with Geel Protein, Nu-  
clein and Iron. It contains the  
vitamine values of these essential  
foods, and vitamins are absolute-  
ly necessary not only to the  
proper growth and development  
of the body, but also the main-  
tenance of normal health.

By adding SUSTO to the daily  
diet of a number of persons se-  
lected for these tests, it was as-  
certained that this preparation  
not only had a marvelous tonic  
effect, but increased body weight  
where it was under normal, and  
showed quick results in the treat-  
ment of poorly nourished chil-  
dren and persons of all ages who  
showed signs of a run-down sys-  
tem.

Since it is rich in vital food  
elements which the average meal  
is apt to lack, SUSTO lays the  
foundation for a full measure of  
bodily strength and resistance to  
disease.

Perrys, our esteemed local  
druggists, are justly pleased at  
the success that is attending the  
connection they have made with  
prominent Boston firm which is  
putting up this preparation, and  
justly deserves the fame of their  
enterprise in introducing SUSTO  
to our city.

### AT THE THEATRES

#### Nyra Brown's Dancing Lessons

Nyra Brown, the clever Broad-  
way musical comedy star, ap-  
pearing in "Listen Irene" George  
E. Wintz's sensational musical  
comedy at the opera house Sat-  
urday, has some ideas of her  
own about what constitutes good  
dancing.

"A dancer," says Miss Brown,  
"should do more than simply  
frisk gracefully about the stage.  
She should give her spectators a  
message and her dancing should  
mean something. It must either  
tell them a story or reflect some  
emotion—happiness, jealousy, or  
something. The actor or actress  
who simply goes through certain  
mechanical steps, no matter how  
gracefully he or she may do it,  
is not a dancer nor an artist.  
This sort of dancing is very in-  
sipid and unsatisfying. It means  
absolutely nothing and any fairly  
graceful person can learn it. The  
artist dances with her face and  
her whole body, not simply with  
her feet. As she goes through  
various steps, her facial expres-  
sion changes and she makes ges-  
tures, conveying a message most  
clearly to the spectators. Her  
dancing actually speaks, not any  
of the languages in every day  
use, but a language that is far  
more beautiful than any other  
language known. It speaks the  
language of the dance."

Entered at the postoffice at Richmond, a second class mail matter, under act of Congress of 1879.

The Louisville Herald suggests a monument or memorial to Marse Henry Watterson. He needs none. But if the Herald, a business and political rival of the paper that he made so famous, leads such a movement, the Daily Register would desire to have a part in such a deserved tribute to the greatest of the latter day journalists.
